LeetCode

Education

Indian Institute of Information Technology Kottayam

November 2022 – May 2026

Bachelor of Technology in Computer Science and Engineering

Experience

Infosys Solutions

May 2024-July 2024

Data Science Intern

Kurnool

- Analyzed structured and unstructured business datasets using Python, Pandas, and SQL to extract patterns that supported client decision-making.
- Developed and deployed machine learning models (classification regression) for predictive analytics, improving forecast accuracy and reducing manual reporting efforts.
- Designed and automated interactive dashboards in Power BI and Excel, cutting stakeholder reporting time by 40% and improving accessibility of insights.
- Performed comprehensive data cleaning, preprocessing, and exploratory data analysis (EDA), increasing model accuracy by 15% and ensuring data reliability.

Projects

Restaurant Ratings Analysis | Python (Pandas, Scikit-learn, Matplotlib, Seaborn), Power BI, SQL

GitHub

- Performed EDA and feature engineering on restaurant datasets to uncover dining trends and preferences.
- Built ML models (Random Forest, XGBoost) to predict customer satisfaction and delivered insights via interactive Power BI dashboards.

Multi Lingual Audio Translation using LLMs | Streamlit, Data Pre-Processing, Python, NLP

GitHub

- Engineered an ASR → NLU → Translation pipeline (15+ languages) using LLaMA 3.1 with sub-1.5s latency.
- Deployed a Dockerized FastAPI microservice with health/metrics endpoints and multilingual catalog normalization.

Workforce Analytics | Power BI, Power Query, DAX, Excel, HR Analytics

GitHub

- Developed Power BI dashboards analyzing employee attrition across demographics, roles, and departments.
- Derived actionable HR insights (16.2% attrition, churn in 26–35 age group, low salaries) enabling data-driven strategies.

Next-Gen Governance- AI Complaint Management System | LLM, React, CSS, Python, JS

GitHub

- Developed an AI-powered complaint management system using LLMs for intelligent triaging and sentiment analysis of civic complaints, achieving 95% accuracy with fine-tuned models (BERT, LLaMA 3.1).
- Leveraged CUDA GPUs (4x faster training) and integrated a React-based real-time interface for seamless complaint tracking and enhanced citizen engagement.

Food Delivery Time Prediction | Python, XGBoost, Streamlit, Scikit-learn

GitHub

- Developed an XGBoost regression model with feature engineering to predict delivery time ($R^2 = 0.82$).
- Built a Streamlit app for real-time ETA predictions with model evaluation and future API integration scope.

Technical Skills

Programming & Databases: Python, SQL, R, C, C++,Java

Machine Learning & Modeling: Scikit-learn, XGBoost, Random Forests, Regression, Classification, Clustering, Time Series (ARIMA, Prophet), Model Evaluation Metrics (AUC, F1, RMSE, MAPE)

AI/ML Frameworks: PyTorch, Transformers

NLP & LLMs: BERT, LLaMA, Text Classification, Sentiment Analysis

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Power BI

Deployment & APIs: Streamlit, FastAPI, RESTful APIs

Cloud ,Big Data & DevOps: Hadoop,Spark ,Docker, Linux, Git, AWS

ACHIEVEMENTS

- Professional Certificate in Data Science And Machine Learning (Link)
- Led a team to qualify for the Smart India Hackathon (SIH) at the college level, showcasing leadership, teamwork, and problem-solving skills.
- Delivered 4 plus full-stack AI/ML projects independently, showcasing innovation, end-to-end ownership, and scalable architecture.
- Solved over 350 plus coding questions across various platforms, strengthening programming proficiency, analytical thinking, time management, and communication skills.
